

## **Bunkers Storm Motion**

“Storm-Motion Bunkers” on [weathernerds.org](http://weathernerds.org) refers to right-moving supercell storm motion following the methodology of Bunkers et al. 2000 except that the mean wind is computed using the effective layer. On [weathernerds.org](http://weathernerds.org), storm motion is only plotted in regions where an effective inflow layer is present. For details on the method please refer to:

Bunkers, M. J., B. A. Klimowski, J. W. Zeitler, R. L. Thompson, and M. L. Weisman, 2000: Predicting supercell motion using a new hodograph technique. *Wea. Forecasting*, 15, 61-79.
